

Position: Postdoctoral Scholar(s) in Microfabrication/Microfluidics
Salary: \$47,000 - \$52,000
Start Date: July 1, 2017 preferred, but not required.

The Department of Biomedical Engineering at the University of California, Davis, invites applications for one or more positions as a Postdoctoral Scholar in the areas of *tissue engineering, microphysiological systems ("organ-on-a-chip"), stem cell biology, tumor microenvironment, and cardiomyocyte biology*. The initial appointment will be full-time, for a 12 month period. The salary range is \$47,000 - \$52,000 per year, and will be commensurate with experience. Renewal of the contract will be contingent upon the availability of adequate funding and performance.

Requirements: A strong background in tissue engineering, angiogenesis, endothelial cell biology, stem cell biology, cardiomyocyte biology, or tumor biology is required. The position requires a Ph.D. in biology, biomedical engineering, or a related field, as well as excellent communication and writing skills.

Application Procedure: Applicants should send their curriculum vitae, name/addresses of at least two references, and cover letter by email (scgeorge@ucdavis.edu) to Professor Steven C. George.

Screening will begin as early as April 1, 2017 and will remain open until all positions are filled.

The University of California, Davis is an equal opportunity employer committed to excellence through diversity.
